## Community Building Day

nationale  
wetenschaps  
agenda

### **NWA Route “Building Blocks of Matter and Foundations of Space and Time”**

Dear colleague,

You are cordially invited to participate in the kick-off one day meeting of the National Science Agenda Route “*Bouwstenen van Materie en Fundamenten van Ruimte en Tijd*”, held on Friday May 25, 2018 (10:00 – 17:00) at Winkel van Sinkel, location Ottone, Utrecht.

This is for us and the NWA initiative an important occasion. It will provide an overview of the broad and inspiringly interconnected scientific research activities in the Route, it will offer the opportunity to further shape future directions and collaborations, and reinforce the dialogue within the Route.

During the meeting we will discuss scientific goals of the Route, the Game Changers, outreach efforts and updates of the ongoing projects within Startimpuls on the theme of Gravity. In addition, there will be a focus session on Emergent Phenomena, one of the Game Changers in the Route. Finally, the future of Route, the relation between the Game Changers and future opportunities will be discussed.

Registration is free, lunch and final drinks included. Further information will follow.

We look forward to welcoming you at this event!

*Ionica Smeets and Stan Bentvelsen on behalf of the NWA Route “Bouwstenen” steering group*
